<b>The Paul Scherrer Institut Briefly</b>	<b>VIII</b>
<b>Programme</b>	<b>XI</b>
<b>Introduction</b>	<b>X</b>
<b>CHAPTER 1: ACCELERATORS FOR ISOTOPE PRODUCTION</b>	<b>1</b>
Introduction: New Cyclotron Installations <i>G. Wolber</i>	2
Production of PET Radionuclides with a High Current Electrostatic Accelerator <i>R.E. Shefer, R.E. Klinkowstein, B.J. Hughey and M.J. Welch</i>	4
Design Considerations for Foil Windows for PET Radioisotope Targets <i>B.J. Hughey, R.E. Shefer, R.E. Klinkowstein and M.J. Welch</i>	11
A Helium-3 RFQ Accelerator for PET Tracer Production <i>W. Hagan, W. Cornelius, P. Young, M. Schulze, R. Little, K. Krohn and J. Link</i>	19
Thin Window for an 8 MeV Helium-3 PET RFQ Accelerator Target <i>M.E. Schulze, A.E. Dabiri, D. Holslin and S.M. Ghiaasiaan</i>	22
The EBCO Technologies Isotope Production System <i>K. Erdman</i>	27
Labeled-Compound Production System with Superconducting Cyclotron <i>K. Kusumoto, K. Mizuno and R. Iwata</i>	32
An Oxygen-15 Generator: Early Experience with the IBA CYCLONE-3 <i>J.C. Clark and J.-L. Morelle</i>	34
The New DKFZ Cyclotron <i>G. Wolber and J. Ahlbaeck</i>	36
Status of the Cyclotron Facility at PENN-PET <i>C. Gonzalez</i>	39
A New PET Center at ULB-Hôpital Erasme in Brussels <i>M. Monclus, J. Van Naemen, B. Van Gansbeke, E. Stanus, L. Bidaut, S. Goldman and A. Luxen</i>	41
Shield Design Calculations for a Radioisotope Production Target Bombardment Station <i>G.F. Steyn, T.J. Van Rooyen, P.J. Binns, J.H. Hough, F.M. Nortier and S.J. Mills</i>	43

<b>CHAPTER 2:</b>	
<b>TARGET PHYSICS AND TARGET CHEMISTRY: SOLID TARGETS</b>	<b>49</b>
Introduction: Trends in Production of Longer-Lived Radionuclides <i>R. Weinreich</i>	50
High Current Targetry for Radioisotope Production <i>W.Z. Gelbart and N.R. Stevenson</i>	52
Radionuclide Production on Cyclotron of Institute of Physics and Power Engineering <i>N.N. Krasnov, Yu.G. Sevastyanov, N.A. Konyakin, A.A. Razbash, A.A. Ognev and A.A. Ponomarev</i>	54
Modified Target System at the Gustaf Werner Cyclotron <i>P. Malmberg, N. Bingefors, O. Byström, H. Condé, L. Einarsson, K. Elmgren, S. Hultqvist, O. Jonsson and H. Lundqvist</i>	57
Targetry for the Routine Bombardment of Solid Targets at the National Accelerator Centre <i>F.M. Nortier, F.J. Haasbroek, S.J. Mills, H.A. Smit, G.F. Steyn, C.J. Stevens, T.F.H.F. van Elst and E. Vorster</i>	60
Targetry and Target Chemistry for the Production of Rubidium-81 and Iodine-123 at the National Accelerator Centre <i>F.J. Haasbroek, R.J.N. Brits, S.J. Mills, F.M. Nortier, P.M. Smith-Jones, G.F. Steyn and T.F.H.F. Van Elst</i>	64
Production of Strontium-82 and Preparation of the Rubidium-82 Generator <i>G.E. Kodina, N.V. Kurenkov, L.N. Kurchatova, A.B. Malinin and T.Yu. Sheina</i>	66
Four Years Experience with a Polyvalent 72 MeV Target Station <i>R. Maag and R. Weinreich</i>	68
Studies for the Production of Iodine-123 at the CV-28 Cyclotron of IPEN-CNEN/SP <i>S.A.C. Mestnik and J. Mengatti</i>	71
A Study of Irradiation Conditions of Mercury Target with Protons to Obtain Thallium-201 <i>L. Fernandes and C.P. Gonçalves da Silva</i>	73
Excitation Functions of Proton Induced Reactions in Natural Tellurium: Production of No-Carrier Added Iodine-124 for PET Applications <i>J. Zweit, M.A. Bakir, R.J. Ott, H.L. Sharma, M. Cox and R. Goodall</i>	76
Yields of Cyclotron Produced Medical Radioisotopes. The Accelerators of Type LINAC-100, U-120 I, Facility „F“ for Radioisotope Production <i>N.G. Zaitseva, L.M. Onishchenko, E. Rurarz, V.A. Khalkin, V.A. Konov, L.M. Popinenkova and V.A. Teplyakov</i>	79
Plutonium-237 Production by Irradiation of Highly Enriched Uranium Targets <i>A.D. Gedeonov, L.A. Pelevin, V.I. Kucheruk, L.P. Bakushkina, V.Yu. Shkroev, A.E. Antropov, A.V. Smirnov and V.P. Gusev</i>	82
Separation of Radionuclides from Cyclotron Targets Using Phosphonic Acid Cation Exchanger <i>A.A. Razbash und Yu.G. Sevastyanov</i>	86
Multiple Scattering and Thermal Dissipation of Charged Particle Beams in Multiple Thin Targets <i>G. Alberti, C. Birattari, M. Bonardi, F. Groppi and M. Silari</i>	89
A Mathematical Method for Evaluating Experimental Radionuclide Activation Yield Data in Charged Particle Induced Reactions <i>E. Cincu</i>	96

<b>CHAPTER 3:</b>	
<b>TARGET PHYSICS AND TARGET CHEMISTRY: LIQUID AND GASEOUS TARGETS</b>	<b>105</b>
Introduction: The Changing Face of Accelerator Target Physics and Chemistry <i>J.J. Sunderland</i>	106
Report on the Posters for Chapter 3 <i>S.J. Heselius and D.J. Schlyer</i>	108
Target Length Measurement and the Reconstructed Target System <i>H.-J. Helmeke</i>	110
The Effect on Yields Due to Beam Focusing on an [Fluorine-18]F <sub>2</sub> Target <i>T.J. Ruth, M.J. Adam, S. Jivan and J. Lofvendahl</i>	113
Development of a Mini-Size Six-Target Revolver for a Low-Energy Dual Beam H <sup>+</sup> Cyclotron <i>S.-J. Heselius</i>	115
New Liquid Target Systems for the Production of [Fluorine-18]Fluoride Ion and [Nitrogen-13]Ammonium Ion with 11 MeV Protons <i>B.W. Wieland, C.W. Alvord, G.T. Bida, G.O. Hendry and J.-L. Morelle</i>	117
New [Oxygen-18]Water Target Design with Removable Nickel and Silver Inserts for Routine Production of [Fluorine-18]Fluoride Anion <i>J. Ropchan, M. Mandelkern, A. Jehlar and W. Biahd</i>	123
Enriched Oxygen-18: Testing the Waters <i>J. Jegge, K. Zimmermann, R. Schwarzbach, G. Reddy, R.J. Nickles, P.A. Schubiger, B. Christian and E. Baker</i>	125
[Fluorine-18]F <sub>2</sub> Production with 8.5 MeV Deuterons <i>R. Wagner</i>	127
[Fluorine-18]F <sub>2</sub> Production via Low Energy Proton Irradiation of [Oxygen-18]O <sub>2</sub> plus F <sub>2</sub> <i>G.T. Bida, G.O. Hendry, A.J. Bishop and N. Satyamurthy</i>	130
A Standard Siemens-CTI Radioisotope Delivery System Produces Fluorine-18 Gas <i>G. Firnau, R. Chirakal, R. De Witte, W. Moore, E.S. Garnett and G. Bida</i>	134
A Dual-Reservoir Remote Loading Water Target System for Fluorine-18 and Nitrogen-13 Production with Direct In-Target Liquid Level Sensing <i>R.A. Ferrieri, D.L. Alexoff, D.J. Schlyer and A.P. Wolf</i>	137
An Fluorine-18 Ion Production Target: Design and Performance <i>J.R. Dahl, T. Chaly, D. Bandyopadhyay, R. Matakchieri, A. Belakhef and D. Margouleff</i>	141
Development of Carbonized Polymer Beads for Generation of Nitrogen-13 <i>E.M. Zippi, G.T. Bida, B.W. Wieland and N. Satyamurthy</i>	143
Irradiation of Water to Improve the Specific Activity of Oxygen-15 Produced from Oxygen-16 <i>J.M. Link, K.A. Krohn and J.H. Courter</i>	148
Irradiation of Thin Targets of Elemental Carbon to Improve the Specific Activity of Carbon-11 Produced from Carbon-12 <i>J.M. Link, K.A. Krohn and W.G. Weitkamp</i>	151
Can Clinically Useful Quantities of [Nitrogen-13]Ammonia be Produced with a 3.5 MeV Deuteron Beam? <i>J.-L. Morelle and E. Liénard</i>	154

Oxygen-15 and Fluorine-18 Thick Target Yield by Helium-3 Bombardment of Natural Water Between 7 and 12 MeV <i>J.-L. Morelle, K. Strijckmans and P. Goethals</i>	160
Oxygen-15 Production with a 3.5 MeV Deuteron Cyclotron <i>J.-L. Morelle</i>	161
On the Production of Bromine-75 and Bromine-77 from Enriched Krypton <i>F. Helus and S. Zeisler</i>	164
Design of Iodine-123 Production Technology on IAE Cyclotron <i>N.I. Venikov, V.B. Gedroytz, V.R. Mikolyuk, V.I. Novikov, A.A. Sebyakin and D.A. Smirnov</i>	167
Comment: Specific Activity of [Fluorine-18]F <sup>-</sup> <i>J.M. Kozirowski</i>	170
<b>CHAPTER 4: AUTOMATION AND QUALITY CONTROL</b>	<b>173</b>
Introduction: State of the Art in Automated Syntheses of Short-Lived Radiopharmaceuticals <i>J.M. Link, J.C. Clark and T.J. Ruth</i>	174
Improved Automated Systems for the Production of Radiopharmaceuticals <i>G.G. Gaehle and M.J. Welch</i>	186
An Autosynthesizer for 2-[Fluorine-18]Fluoro-2-deoxy-D-glucose <i>T. Mäder, U.W. Scherer, R. Weinreich and N. Schmid</i>	190
Improvements in Quality Assurance of 2-[Fluorine-18]Fluoro-2-deoxy-D-glucose <i>M. Argentini, T. Mäder, L. Wyer and R. Weinreich</i>	196
Cryptand [2.2.2] Quantitation in the Synthesis of 2-[Fluorine-18]Fluoro-2-Deoxy-D-Glucose <i>P.J. Kothari, J. Ginos, R.D. Finn, S.M. Larson, J.M. Link, K.A. Krohn and K. Garmestani</i>	199
PET Radiochemistry at Hospital San Raffaele, Milan <i>F. Colombo, R. Casati, M. Matarrese, S. Todde, M. Vaghi, A. Carpinelli and F. Fazio</i>	202
Automated Carbon-11 Radiopharmaceutical Production <i>J.C. Clark and K. Dowsett</i>	207
Automation of the Synthesis of [2-Carbon-11]Thymidine <i>J.H. Courter, J.M. Link and K.A. Krohn</i>	210
Recent Progress in Automation at CYRIC <i>R. Iwata, C. Pascali and T. Ido</i>	215
Robotic Synthesis of [1-Carbon-11]Acetic Acid <i>M.V. Korsakov, D. Solovyov, A.G. Horti, O.F. Kuznetsova, L.-E. Nilsson and J. Ulin</i>	218
Robotic Synthesis of [Carbon-11]Methionine <i>M.V. Korsakov, M. Yu. Kisselev, D. Solovyov, A.G. Horti, D.A. Vasilev, L.-E. Nilsson and J. Ulin</i>	220
Improvements in Quality Assurance of [Carbon-11]Flaclopride <i>U.W. Scherer, A. Gut, T. Mäder, H. Oehninger, R. Weinreich and N. Schmid</i>	223
Reducing Radiation Exposures to Personnel Via an Inexpensive „General Carbon-11 Methylation Module“ <i>M.S. Haka</i>	228

An HPLC System for the Rapid Determination of Specific Activity <i>J.R. Grierson and K.A. Krohn</i>	231
„R2D2“ - A Bedside [Oxygen-15]Water Infuser <i>J.C. Clark and H. Tochon-Danguy</i>	234
<b>CHAPTER 5: REPORTS FROM THE LABORATORIES</b>	<b>237</b>
Status Report from Hammersmith <i>J.C. Clark</i>	238
The Radiopharmacy Department at Paul Scherrer Institut <i>P.A. Schubiger</i>	242
The New National Medical Cyclotron in Sydney <i>W. Schoell</i>	243
Current Status of the Melbourne PET Centre <i>H.J. Tochon-Danguy</i>	245
Radioisotope Production at IPEN-CNEN/São Paulo <i>J.A. Ossa, Jr.</i>	246
The National Accelerator Centre, Faure, South Africa <i>F.J. Haasbroek</i>	247
Performance Specifications of the Y-120 Cyclotron Facility of the Institute of Atomic Physics in Bucharest <i>E. Cincu</i>	249
Development and Production of Radiopharmaceuticals at IBP Moscow <i>G.E. Kodina and A.B. Malinin</i>	250
Production of Radionuclides at IPPE, Obninsk <i>N.N. Krasnov</i>	251
Nuclear Medicine Applications in IAE Cyclotron Laboratory , Moscow <i>A.A. Sebyakin</i>	252
The Radium Institute of St. Petersburg, Russia <i>A. Gedeonov</i>	253
<b>CLOSING REMARKS AND ANNEXES</b>	<b>255</b>
Closing Remarks <i>T.J. Ruth</i>	256
Annex 1: PETBASE - A Database of PET/Targetry Users and Sites <i>S. McQuarrie</i>	258
Annex 2: Valve List <i>J.C. Clark and K. Dowsett</i>	259
Annex 3: List of Suppliers of Glassy Carbon <i>J.C. Clark</i>	263
Annex 4: List of Authors	264
Annex 5: List of Participants	266
