of Chemistry,
Brookhaven
National Laboratory,
New York, USA

The Journal of Labelled Compounds and

Radiopharmaceuticals publishes original scientific manuscripts dealing with all aspects of research and development leading to and resulting in labelled compound preparation. Related areas, such as analytical control, self radiolysis, quality control handling and storage are also covered. Papers on compounds and tracer methods used in chemical, biochemical, biological, pharmacological, medical, genetic, agricultural and geochemical research and application also appear. All radionuclides and enriched stable nuclides are included.

Preparation and application of labelled compounds now pervades almost every area of scientific research. The journal is devoted to reporting new developments from a multidisciplinary base.

SUBSCRIPTION DETAILS

Volume 38 (1996) 13 Issues \$1295.00

Prices include postage, packing and air-speeded delivery

Now available...

Journal of Labelled Compounds and Radiopharmaceuticals Abstract Supplement

*Eleventh International Symposium on Radiopharmaceutical Chemistry
Abstracts - Vancouver, B.C., Canada - August 13 - 17, 1995*

Volume XXXVII 851pp December 1995 US \$88.00/£55.00

For further information on this special abstract supplement and a FREE sample copy of the *Journal of Labelled Compounds and Radiopharmaceuticals*, please write to either address:
